Subject: Microsoft Settlement

Dear Sirs,

Please register my objection to the proposed Microsoft settlement. The Proposed Final Judgment has already been made obsolete by the fast-moving computer market. The settlement omits Windows operating systems on PDAs, or gaming platforms such as MS XBox, which will undoubtedly provide fertile fields for Microsoft to further leverage its monopoly. Even now, Microsoft is harrassing Lindows.com, a Windows-compatible operating system. There is no evidence whatsoever that Microsoft has learned its lesson, or has any intention of refraining from the illegal activities it has engaged in in the past.

Please revise the settlement to include *all* of the market segments that Microsoft's monopoly touches, not just the segments where the competition is already dead.

Sincerely,

Michael Roberts, CTO
MyPrintGuys, Inc.
